

## Matrix F2 FEATURES AND BENEFITS

ComTouch™ Touch Screen Technology	User is guided through a step by step process by the machine at their fingertips. Easy to see, easy to use.
Your most frequently used services at your fingertips	18 programmable OneTouch functions means you can select your regular mail jobs easily by pre-programming your favourites.
600 DPI Quality Print	Gives a crisp print impression which will show off customer logos and advertising messages with perfect clarity
Date stamp your incoming mail	This no longer needs to be an additional task for someone to do with a rubber stamp. Feed incoming mail through the F2 machine and it gives a 'RECEIVED' impression with date, time and level of importance boxes.
Five advertising stamps available	Don't feel restricted, use your F2 machine to design any kind of advertising message which you may use seasonally, or interchange such as 'Happy Easter'. Make your mail work harder.
Additional text	You can also add additional text to your impression instead of your advertising message, excellent for short-term promotions, campaigns or important information for your customers. You can do this yourself from your F2 machine.
Increased security options	Ability to block high franking amounts to ensuring your machine is protected from persons processing amounts which are not pre-agreed with the company. An option available, if required.
Report printing	Keep track of your machine usage with a selection of in-built reports which can be printed from your F2 machine
Up to 10mm envelope thickness allowance	A generous envelope allowance means you can process most mailing types through your F2 machine. Giving you flexibility.
Access a multitude of Royal Mail postal services through your machine	Your franking machine is capable of giving you access to much more beyond 1st and 2nd class. Try out the F2 to send Special Delivery, International and Recorded all available at your fingertips.
1250 letters per hour	Your F2 will help you to whiz through your mail, helping to lighten your load.
